

Crystal Cable CrystalConnect Micro / CrystalSpeak Micro

“Clean, composed and transparent, the jewel-like Crystal Micro cables offer an open sound-stage where images snap into focus and music is conveyed with a turbine-like smoothness. Even some softness in the bass and a bit of forwardness in the treble don’t diminish one of the most transparent cables Neil Gader has heard. Unique splitter rings allows easy change-out of terminations or bi-wire upgrades.” The Absolute Sound 164, excerpts from Neil Gader
