

CrystalCable
portable
dreamduet

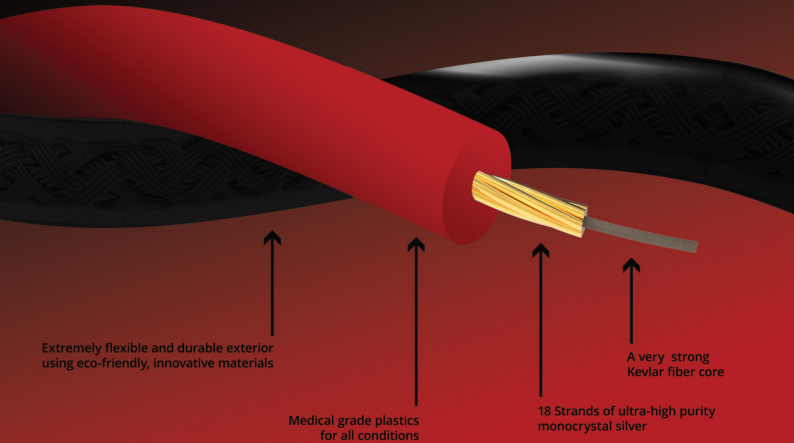

With Duet, Crystal Cable created the first high-end portable cable in the brand's product range. Now, Crystal Cable presents **Dream Duet**.

With **Dream Duet** we introduce our monocrystal silver technology to the portable audio market, taking our portable line to a whole new level!

This brand new high-end portable cable uses 18 hair-thin strands of unique, ultra-high purity **monocrystal** silver per conductor and perfectly combines:

- Red & black, passion & power
- High-tech medical grade plastics with eco-friendly materials
- Extreme durability with ultra-flexibility
- High-end Oyaide connectors with all kinds of headphone and IEM termination.

With Crystal Cable's latest conductors less really is more: less micro-distortion, less intrusive electrical effects, less mechanical interference – **more music.**
